

July 19th, 2013

Scott,

Thank you for the many years of service that you have provided us. After a few failed attempts with some other landscaping companies, I appreciate that I no longer need to manage the people who are supposed to be managing the people doing our landscaping. The grass gets mowed, the hedges are kept trim, the flower beds look great, and no phone calls need to be made because someone is checking to make sure that all of that gets done. After working with three other companies, it is nice to find one that does it right.

By the way, I used to always dictate what I wanted in the flower beds because I had discovered that most landscaping companies just put the cheapest flowers out, which makes our flower beds look just like everyone else's. Mike does a great job of picking out nice stuff to give it color and interest, and I no longer need to do that. Thanks for making my life easier.
